

Level up your plots

RMedicine 2023 | Workshop | Cara Thompson

The slides are available on my website

<https://www.cararthompson.com/talks/rmedicine2023-workshop/>

This allows you to easily copy the code from the quarto slides and reuse at will!

You are encouraged to bring a ggplot of your own making to the workshop – we will code our way towards a better version of it together.

Here's a list of the packages I'll be using

Available on CRAN

- tidyverse
- palmerpenguins
- systemfonts
- monochromeR
- ggtext
- geomtextpath

Available from GitHub

- colorblindr

See instructions at

github.com/claustwilke/colorblindr

See you there!
